

## **How to order Omni's ProRen™ Bladder Management System(s) through the Veterans Administration**

Please note that the System and supplies are covered 100% by the VA benefits and there is no out of pocket cost to the Veteran.

We do have two options available to choose from. One, the **CUP** System what was originally designed for the military and now the **FLO** System (condom catheter) which was developed under the guidance of Boeing and NASA. Both Systems are being widely accepted and used. It will be up to the patient and you as the provider to choose the best System for the patient. They ultimately accomplish the same function with slight differences.

The **CUP** System uses no adhesives and is held in place with an undergarment (this System is best for patients who aren't as active or who are non-ambulatory) or for patients who cannot tolerate adhesives because of skin integrity issues. The **CUP** System can be worn at night however; the patient must sleep on their back and at a 35 degree incline.

The **FLO** (condom catheter) System uses a hydrocolloid adhesive that is used in wound care healing, but nevertheless is an adhesive. The **FLO** System does not require an undergarment to be worn but functions with Omni's patented driven pump technology control unit just as the **CUP** System would. This System is intended for the more active patients who can tolerate adhesives and for those patients who would like to use this System for nighttime use and sleep flat on their back or in a supine position.

I have included a piece of literature to show the differences in the System.

Also below, you will find the ordering instruction on how to place the initial Prosthetic consult as well as how to order supplies when the patient is ready. I would be happy to come to the VA and in-service the patient once you order the System or prior to you ordering the System if you feel it is necessary; however I will say that the System is very user friendly and comes with a User Manual DVD and full color printed manual.

### ***An Alternative Approach to Bladder Management***

**HOW TO ORDER OMNI'S BLADDER MANAGEMENT SYSTEM**

Typically, to put a patient on the System (either the CUP or FLO) you would submit a **Prosthetic Consult**. Pasted below are boxes that you can "Cut & Paste" from and drop into your ordering {CPRS System} for ease of ordering.

The top two boxes are for the "Starter Kit" (ordered through the *Prosthetics Department*) and the bottom two boxes are for the "Supply Kits" (typically ordered through the *Pharmacy Department*).

A majority of our VAMC's will have the Prosthetics Department order the Starter Kit (CSK) and then when ready, the first supply kit (CSK-B), then the Pharmacy Department will then take over the process of ordering the remaining supply kits (CSK-B). This will of course depend on your VAMC and what protocols and polices it follows. This is merely a guideline to assist you in how a majority of our VAMC's order the product.

**Copy and paste template to reduce consult entry time for often ordered Omni's Bladder Management Systems and/or supplies.**

When completing a consult copy and paste one of the following into the "other" box at the bottom of the consult (use "CTRL V" to paste into CPRS system).

**Copy and paste all of the following into the consult when ordering**

**STARTER KITS – ORDERED BY THE PROSTHETICS DEPARTMENT**

**Omni's Bladder Management System (ProRen CUP™) Starter Kit**

GSA Vendor & Contract No: V797P-4055b

<b>GSA Part #</b>	<b>MFG Part #</b>	<b>Description</b>	<b>Qty</b>	<b>FSS Net Price</b>
CSK	CSK-1-CUP	Control Starter Kit w/ 1 month supply (CUP option)	1	\$2980.00

HCPCS: E1399
